

# NPC Treatment Court Dashboard

NPC Research created a dashboard for treatment courts that is available for free to Bureau of Justice Assistance (BJA) grantees and other courts through funding from BJA and the National Drug Court Institute (NDCI).

The dashboard is a program performance measurement tool for treatment courts that do not have access to more robust case management or data systems. The dashboard is not a case management tool.

## The NPC Treatment Court Dashboard:

- ✓ Tracks key program performance metrics you can use for evaluation, funding, and team meetings
- ✓ Provides visual representations to help you easily understand your program's performance
- ✓ Updates in real-time so you can quickly respond to your program's trends
- ✓ Allows you to customize data visualizations to display measures for different groups such as by participants' status (e.g., active, graduate, non-graduate)
- ✓ Provides metrics by race/ethnicity, gender, and age so you can easily monitor for potential disparities
- ✓ Simplifies and streamlines BJA grant reporting
- ✓ Utilizes data validation and drop-downs to make data entry easier and reduce errors
